

LED LIGHTING FOR TODAY'S SMART BUSINESS

We lighten your
energy costs
with LED.

Today's LED lighting solutions delivers high quality light output for every environment. LED lighting doesn't draw as much energy as conventional bulbs, saving you money from the day they're installed. Plus, competitive pricing and energy rebates lower your cost of conversion and result in greater efficiency for your business, reducing your energy cost for lighting by about 50%.

Advantages of LED

VALUABLE

Lower your lighting costs by as much as 50%

Capture a return on investment in 1-3 years

Take advantage of energy rebates and tax deductions

Increase your commercial property value

SUSTAINABLE

Fulfill your corporate sustainability goals

Earn LEED points and other energy credits

Reduce your carbon footprint

Made from environmentally safe and non-toxic materials

Demonstrate a commitment to energy innovation

EFFECTIVE

Improve property security with high quality LED technology

Lower your light heat output to help control indoor temperatures

Forget about replacing your LEDs: LEDs are rated for 50,000 hours of use – that's 15-25 years!

PROCESS

From the initial analysis to the moment you flip the switch to LED, our process is designed with you – and your energy savings – in mind.

SITE REVIEW & LIGHTING ANALYSIS Our experts will talk over your lighting needs with you, analyze your energy use and costs, and provide you with intelligent LED lighting alternatives for your requirements.

PROJECT ESTIMATE We then prepare a project estimate to show your company's financial investment, available financing options, rebates and warranties. You'll know exactly what you get for your investment and what returns to expect.

DESIGN & INSTALLATION Then, we design a custom layout and order your products. Most installations can be completed in about a week: we deliver a quality finished product on time and on budget.

QUALITY ASSURANCE Our process concludes with a final report that includes a comprehensive project overview plus warranty and safety information. No job is complete until we conduct a final quality inspection.

POWERENFO SAVINGS VERIFICATION

We include our PowerEnfo energy monitoring technology with every commercial project to show exactly what you're saving. And from there, you can modify your consumption habits to further decrease your power bill.
