

## REAL-TIME, WEB BASED MONITORING

PowerEnfo is a software service that provides real-time, consumable information via the internet to monitor and manage your entire electrical footprint, from energy generation to load level consumption.

- Easily manage one or multiple buildings!
- Specifically designed for the mobile world, allowing the user to access them from any smart device, anywhere.

## Dashboard »

PowerEnfo's energy dashboard displays energy data in a simple format that any user can quickly understand. The dashboard displays your building's real-time energy status allowing the user to make decisions and adjustments that make an instant impact. The dashboard is customized with your logo and allows for easy transition to multiple dashboards for specific sites or buildings in your portfolio. The dashboard includes:

- Current Electric Demand (kW)
- Total Daily Consumption (kWh)
- Week Over Week Daily Consumption Comparison
- Solar Production (as compared against system capacity) and Carbon Equivalents
- Link to Raw Data

## Alerts/Alarms »

PowerEnfo is an event-based platform that automatically notifies you via SMS text message and/or email when specific events occur. Each alert can have a customized list of recipients. Although our list of alerts continues to grow, the current alerts include:

- Meter Down/Meter Up
- High Consumption
- High Demand
- Low Solar Production (against the average)
- Low Solar Performance (against the system capacity)

## Reporting »

Reports will be generated and distributed on a daily, weekly and/or monthly basis to a customer provided distribution list. Reports are the output of the PowerEnfo analytic platform with the intention of providing actionable data. Current reports include:

Report Name	Report Description
Monthly Metrics	Month over month electric footprint comparison
Energy Analysis	Total consumption and max demand (including time hit) for each load
Monthly Electric Generation	Total electricity generated by site and entire portfolio
Monthly Electric Consumption	Total electricity used by site and entire portfolio
Dashboard Summary	Summary of dashboard status by site and entire portfolio
Daily Alert Summary	List of all alerts sent out the prior day
