

Rooftop Solar PV CASE STUDY

Chemique Adhesives

Chemique Adhesives is a UK based company specializing in the manufacturing and supply of industrial adhesives, sealants and adhesive application equipment. Their North American headquarters is located in Kennesaw, GA. We were able to help Chemique cut their utility costs by more than 50% with a 30KW rooftop solar array.

Their real time solar production can be displayed in the lobby or accessed by management from any device via our PowerEnfo platform. This allows for the accurate measurement and verification of savings over the life of the system as well as the ability for Chemique to clearly display their strong commitment to environmental stewardship.

Project Goals

- Offset 50% of electricity bill
- Under 3 year payback
- Display environmental committment

System Size

30 KW

ROI Payback Period

2.5 Years

Energy Savings

55%
